

RANIELLI MONTAGNA

Full Stack Software Engineer | React, React Native, Node.js and TypeScript

Paráí, RS, Brazil | raniellimontagna@hotmail.com | +55 54 99979-0871 | www.linkedin.com/in/ranimontagna | ranimontagna.com

PROFESSIONAL SUMMARY

Full Stack Software Engineer with 5+ years of experience building scalable web and mobile applications for retail, logistics and SaaS products. Primarily works with React, React Native, TypeScript, Node.js, Next.js and Go, connecting frontend, backend and architectural decisions to business outcomes. Experienced in micro frontends, REST APIs, Design Systems, CI/CD, monitoring, accessibility, performance and cross-functional collaboration with Product, UX, Backend and Operations teams. Growing focus on Artificial Intelligence applied to software development, including LLM integration, automation, Model Context Protocol (MCP) and developer productivity.

KEY ACHIEVEMENTS

- Built and evolved solutions used in inventory and logistics operations across 1,000+ physical retail stores.
- Contributed to reducing operational failures by up to 30% through improvements in critical workflows, validations, integrations and user interfaces.
- Created and scaled a Design System across 5 products, reducing development time by 40% and improving UI consistency.

TECHNICAL SKILLS

Frontend and Mobile: React, React Native, Next.js, Expo, TypeScript, JavaScript, Tailwind CSS, Material UI, Styled Components, Stitches, Electron, Zustand, React Query, React Hook Form, Zod, Framer Motion, mobile-first development and accessibility (WCAG).

Backend and APIs: Node.js, Fastify, Express.js, REST APIs, GraphQL, Go, PostgreSQL, Prisma, Drizzle ORM, JWT and third-party API integrations.

Architecture and Engineering: Micro frontends, Design Systems, Storybook, Monorepo, Clean Code, SOLID, unit and integration testing, feature flags, CI/CD, Docker, Git, GitFlow, GitHub Actions, Vercel, Cloudflare, Linux, Postman, monitoring, observability and troubleshooting.

AI and Productivity: AI-assisted development, OpenAI Codex, Model Context Protocol (MCP), Ollama, Continue.dev, Claude workflows, LLM automation, AI agents, technical prompting and accelerated AI prototyping.

PROFESSIONAL EXPERIENCE

Luizalabs (Magalu) - Software Engineer

Remote | October 2023 - Present

- Develops and evolves web and mobile applications for inventory management, logistics and physical store operations, supporting processes used across 1,000+ retail stores.
- Contributed to reducing operational failures by up to 30% through improvements in critical workflows, validations, integrations, usability and user interfaces.
- Optimized workflows used by 500+ inventory operators and clerks by combining performance improvements, continuous user feedback and usability testing.
- Contributes to the evolution of Node.js APIs, Go services and micro frontend architecture, focusing on scalability, resiliency, stability and deployment reliability.
- Partners with Product, UX, Backend and Operations teams to translate business requirements into scalable technical solutions aligned with user experience.
- **Tech stack:** React, React Native, TypeScript, Node.js, Go, REST APIs, Micro Frontends, Git, CI/CD.

Smarten Venture Builder - Tech Lead / Senior Frontend Developer

On-site | May 2022 - September 2023

- Led frontend architecture for SaaS products, establishing coding standards, mentoring developers and driving strategic technical decisions.
- Created and led the adoption of a Material Design-based Design System across 5 products, improving UI consistency and reducing development time by 40%.
- Implemented CI/CD pipelines and continuous monitoring, reducing deployment time by 40% and increasing delivery reliability.
- Conducted code reviews and technical mentoring, accelerating onboarding for new developers and improving overall code quality.
- **Tech stack:** React, JavaScript, TypeScript, Tailwind CSS, Storybook, CI/CD, Monitoring.

PROFESSIONAL EXPERIENCE (CONTINUED)

SBSistemas - Frontend Developer

On-site | May 2021 - May 2022

- Developed corporate web and desktop applications with React, Electron and TypeScript, building screens, reusable components and API integrations.
- Refactored interfaces to improve performance, maintainability and code consistency in business-focused software solutions.
- Applied best practices for version control, GitFlow, code standardization, requirements analysis and usability testing.
- Collaborated with technical and business teams to deliver features, resolve production issues and improve user experience.
- Tech stack: React, Electron, TypeScript, JavaScript, HTTP, Git.

Tremil Móveis - Furniture Designer

On-site | 2016 - 2021

- Created technical furniture design projects based on client requirements, ergonomics, production feasibility and attention to detail, strengthening problem-solving, client communication and user experience thinking.

EDUCATION

Universidade de Passo Fundo - Associate Degree in Systems Analysis and Development - 2020 to 2022

CERTIFICATIONS

Android, React Native, Node.js, ReactJS

LANGUAGES

Portuguese: Native | English: Intermediate
