PROFESSIONAL SUMMARY

Full Stack Software Engineer with 5+ years of experience building web and mobile applications, from the front end to cloud infrastructure. On Lemon Energia's AI team, I shipped six internal finance products to production in three months, end to end, with React, Fastify, PostgreSQL and infrastructure as code (Pulumi) on AWS. At Luizalabs (Magalu), I built applications and Go and Node.js services on GCP used across 1,000+ stores; before that, I was Front-end Tech Lead at Smarten, owning a design system and CI/CD. Co-founder of Atto, a software house and marketing agency. I use AI in development with a method: spec-driven development, TDD, critical review and evals, with Claude Code, Codex and the Model Context Protocol (MCP).

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Go, SQL, HTML, CSS.

Front-end & Mobile: React, Next.js, React Native, Expo, Svelte, Astro, Vite, Tailwind CSS, Electron, TanStack Query (React Query), Zustand, React Hook Form, Zod, GSAP, Framer Motion, Micro Frontends, Design Systems, Storybook, accessibility (WCAG), web performance (Core Web Vitals).

Back-end & APIs: Node.js, Fastify, Express.js, Go, REST APIs, GraphQL, messaging (RabbitMQ, Amazon SQS), PostgreSQL, Amazon Aurora (RDS), Redis, Prisma, Drizzle ORM, JWT.

Cloud & DevOps: Amazon Web Services (AWS): ECS Fargate, Aurora (RDS), EventBridge, SQS, Secrets Manager, API Gateway, CloudFront; Google Cloud Platform (GCP); Cloudflare (Workers, D1, R2, Durable Objects); infrastructure as code (IaC) with Pulumi; Docker; CI/CD; GitHub Actions; Linux.

Quality & Observability: automated testing (Vitest, Playwright, Testing Library, axe), TDD, SonarQube, Grafana, Sentry, Lighthouse, monitoring, feature flags, Clean Code, SOLID, monorepos, Git.

Applied AI: AI-assisted development, AI agents, spec-driven development, Model Context Protocol (MCP), LLM integration (Anthropic Claude API, OpenAI, DeepSeek, OpenRouter), evals, prompt engineering, Claude Code, Codex, Gemini CLI.

Product & Leadership: product discovery, requirements gathering with business teams, technical leadership, mentoring, collaboration with Product, UX and Operations.

Marketing & Acquisition (Atto): Meta Ads, WhatsApp Cloud API, SEO, funnel and measurement.

PROFESSIONAL EXPERIENCE

Lemon Energia - Software Engineer

Remote | July 2026 - Present

On Lemon's AI team, I work from inside Finance: I find the manual work and decide, with the business, what becomes a product, delivering it end to end.

- Shipped six internal finance products to production in three months, including bank reconciliation, payment batches, suppliers, invoices and debit notes
- Built each product end to end: React and TypeScript front end, Fastify API on PostgreSQL and infrastructure as code (IaC) with Pulumi
- Built the AWS infrastructure with ECS Fargate, Aurora (RDS), EventBridge, SQS, Secrets Manager, API Gateway and CloudFront
- Run continuous discovery with the Finance operation and document requirements, decisions and trade-offs
- Use AI agents in the development workflow, with critical review before each change reaches production

Atto - Co-founder & Software Engineer

Remote | January 2026 - Present

Software house and marketing agency: custom products, integrations, AI automation and acquisition campaigns. I lead engineering, from the technical proposal to operation.

- Quadralize: sports court management platform with scheduling, CRM, point of sale, payments and finance (React, Node.js, PostgreSQL)
- TALA Drone Partners: partner platform for the regional expansion of agricultural drones, with dashboard, CRM, tracking and commissions
- Fronteira Sul Drones: agricultural e-commerce with catalog, consultative cart and WhatsApp checkout (React, Cloudflare Workers, R2)
- AI virtual assistant (Anthropic Claude) for website and WhatsApp support, integrated with the CRM and with human handoff

Luizalabs - Mid-level Software Developer

Remote | October 2023 - June 2026

- Built solutions used in inventory and logistics operations across 1,000+ Magalu physical stores
- Contributed to the daily workflow of 1,000+ stock associates in the corporate React Native super app with micro frontends
- Built Go and Node.js services on Google Cloud Platform (GCP), with RabbitMQ queues, REST APIs and React micro frontends
- Tracked code quality in SonarQube and operations in Grafana
- Worked through Black Fridays, retail's highest-load and most critical period

Smarten - Front-end Tech Lead

Remote | May 2022 - September 2023

- Led and mentored a team of front-end developers on SaaS products
- Created and maintained a design system adopted across multiple products
- Implemented CI/CD, monitoring and quality standards, improving performance and maintainability

SBSistemas - Front-end Developer

On-site | May 2021 - May 2022

- Built front-end applications with React, Electron, TypeScript and JavaScript, with reusable components and interface patterns
- Applied maintainability, testing and code quality practices

PROJECTS

• Klick (klick.ranimontagna.com): offline-first speedcubing timer, a PWA for all 13 WCA events. Svelte 5, IndexedDB, Cloudflare Workers, Durable Objects, D1 and R2; tested with Vitest, Playwright and axe.

• Grimory (grimory.com.br): D&D 5e table in Portuguese with AI (Anthropic Claude API) and a rules engine. React, TanStack Query, Astro and Cloudflare Workers.

• ranimontagna.com: personal site in Next.js with its own AI chat, three languages and 1,300+ automated tests.

EDUCATION

Universidade de Passo Fundo - Associate Degree in Systems Analysis and Development - 2020 to 2022

CERTIFICATIONS

Android, React Native, Node.js, ReactJS

LANGUAGES

Portuguese: Native | English: Intermediate
